

# Solving the Jigsaw

---

**Changing the Culture of Violence**  
**Building a Culture of Well being**

Solving the Jigsaw is a multi award winning school based violence prevention and well being program. The Solving the Jigsaw team has 13 years experience in the development and delivery of school based, group work programs for children and young people.

## Professional Development and Training Modules

The Solving the Jigsaw training team provides nationally accredited competency based facilitator training courses, training workshops and professional development modules.

We provide training for teachers, welfare and social work professionals, tertiary students, children's workers, agencies and organisations.

# Who can attend ?

Taken as a whole, the six modules provide a comprehensive training program for a practical whole school or cluster approach to well being, violence and bullying. The modules provide an excellent training opportunity for implementation of the National Safe Schools Framework.

Philanthropic support has enabled training to be scheduled in several locations across Victoria that teachers and those working with young people are encouraged to enrol in.

Alternatively, schools, organisations or groups of people may contact EASE to run a program of their choice. This booklet outlines a series of training modules designed to cover a range of well being and violence prevention skills, activities and strategies.

## Time commitment

Each module is designed as a one day professional development program.

## Training Style

The training is interactive and includes activities, resources, discussions, video footage and transcripts of interactions with children in the classroom and during individual follow up.

**“Comfortable environment—being engaged—not being talked at’ Training Participant**

## Cost

In Victoria, training days are currently subsidised through the generous support of The R.E. Ross Trust, Portland House Foundation and FJ Foundation. Refer to Registration Form for details.
